I agree to comply with the City of Gresham Erosion Control standards.

I will construct and maintain (ESC) erosion and sediment control measures to contain sediment on the construction site.

Additionally, the site address will be clearly visible from the street.

ESC measures MUST be inspected prior to any stripping, grading or excavation work and again after excavation is complete. Please schedule these inspections by contacting Wood Village at 503-636-9347.

Included with this permit must be a plan showing the activities including, but not limited to: construction, landscaping, vegetation removal, stockpiling of soil or construction debris, grading, filling, excavating, trenching, drilling, transport of fill, utility work, etc. that disturbs 250 square feet or more of land surface area.

OR

Activities as described above or that disturb less than 250 square feet of land surface and are located within 25 feet of any pond, creek, waterway, wetland, and drainage way.

EXEMPTIONS

Landscaping activities in conjunction with a single-family residence. "Landscaping Activities" means: The installation or removal of vegetation and minor landscaping features.

RESPONSIBILITY

Once your plan is reviewed and a final version is approved, you are responsible for implementing the Erosion Control Measure laid out in the approved plan prior to starting construction.

Additionally, you are required to schedule an Initial Erosion Control Inspection (after measures are in place), as well as a Pre-Footings Inspection (after excavation is complete).
