# CITY OF WOOD VILLAGE 2013-14 BUDGET

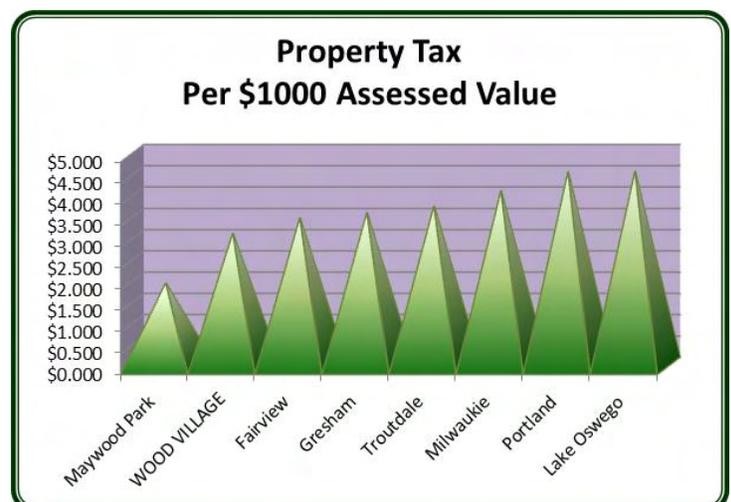

FINANCE DIRECTOR PEGGY MINTER

Oregon Local Budget Law requires each local governmental unit to prepare and adopt an annual balanced budget. A budget is a **financial plan** containing estimates of revenues and expenditures by fund for a single fiscal year. A Budget Committee, comprised of the five City Council members and five citizen volunteers of the City, reviews and approves the proposed budget and the tax rate or levy. The City Council may make certain adjustments to the approved budget before adoption in June.

Here are some quick facts about the Wood Village budget:

- Our major income is from property taxes, which has dropped during the past two years.
  - Property tax revenue in 2013-14 is expected to be \$725,000
  - Public Safety (Police, Fire, & 911) will cost \$853,924 this year
- Wood Village is proud to acknowledge that we have the second lowest incorporated city property tax rate in the Portland metro area:
- The City of Wood Village has absolutely no outstanding debt, so we can use our resources for current expenses rather than paying principal and interest on prior purchases. (Think of this as credit card debt: Wood Village has no monthly payments for credit card debt).
- Our budget has been planned to utilize only current revenues for current expenditures during the year. Differing from the Federal Government, the City of Wood Village does not engage in deficit spending; local cities by law are not allowed to overspend their budget.

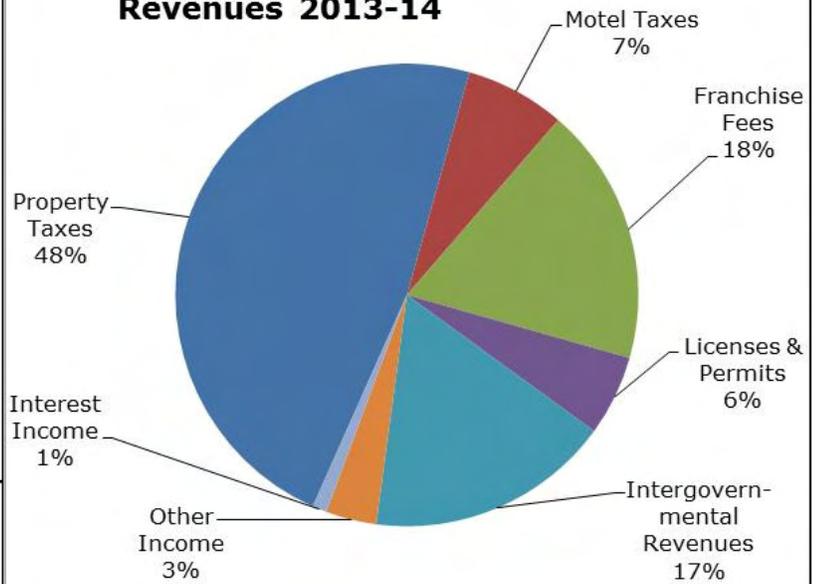

- Increases in employee health insurance costs are split between the City and the employees.

The budget is comprised of four funds. Below are the current year (12-13) and upcoming year (13-14) expenditures by fund, along with the percentage change. Funds are strictly limited: they cannot go over budget and money earned or budgeted in one fund cannot be moved to another fund. (i.e. Water user fees can only be used to pay for water fund expenses).

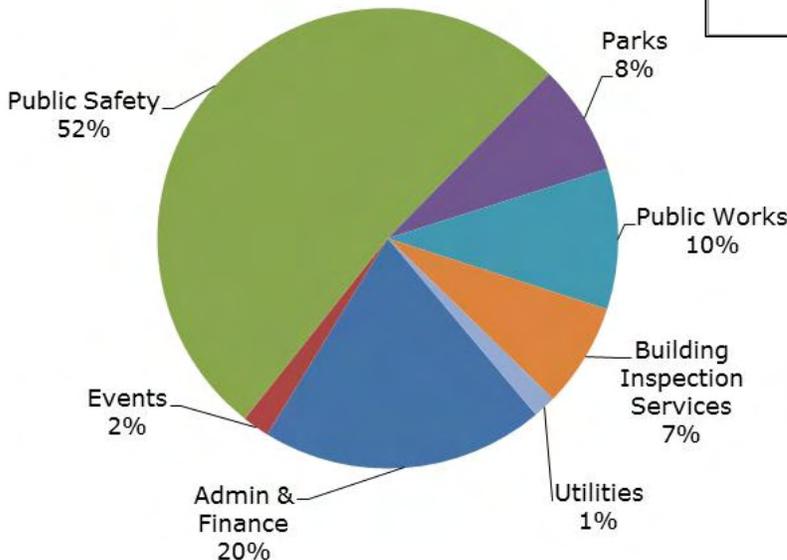

Funds	Adopted Budget FY 2012-13	Proposed Budget FY 2013-14	Percent Change
General Fund	\$4,369,969	\$4,363,404	(0.1%)
Street Fund	581,791	618,000	6%
Water Fund	1,365,245	1,487,050	9%
Sewer Fund	1,253,604	1,121,000	(11%)
<b>Total Proposed Expenditures</b>	<b>\$7,570,609</b>	<b>\$7,589,454</b>	<b>0.25%</b>

The General Fund, as the major operating fund for the City, includes such organizational units as general government, administration, parks, and public works management. The general government unit is comprised of city council activities and the administration unit includes executive, city recorder, finance, public safety contracts, building permit, land use planning and zoning, and economic development services.

**Revenues 2013-14**

**Expenses 2013-14**

The Street Fund expenditures increased this year due to additional street maintenance (slurry seals) on City streets. The Water Fund expenditures went up this year due to planned painting maintenance of the Cherry Park Water Tanks.

The proposed budget for the General Fund is supported by a variety of revenue sources with the most significant receipts coming from property taxes estimated at \$725,000 and motel taxes estimated at \$109,000.

# MULTNOMAH COUNTY ROAD PROJECTS

## HALSEY

2013 in Wood Village has seen major improvements on Halsey Boulevard underway. The work Multnomah County undertook in 2010 to install sidewalks will now be completed leaving Halsey fully constructed from 238<sup>th</sup> to 244<sup>th</sup>. The gravel areas between the asphalt and the curb will all be eliminated, and a new roadway constructed, along with significant drainage improvements. As residents are aware, this work is underway and will continue for the next several weeks. Flaggers will be working with traffic to maintain one lane of traffic flow throughout the project.

## SANDY

Sandy Boulevard from 238<sup>th</sup> westerly to near the Townsend Farm access road will be receiving major maintenance this summer as well. County crews will soon begin repairs where asphalt failures have occurred, and will be providing a new roadway surfacing treatment by late summer or fall of this year. The County plans to maintain traffic access on Sandy throughout the maintenance process, however, you can expect flaggers and potential delays.

## 238<sup>TH</sup> DR

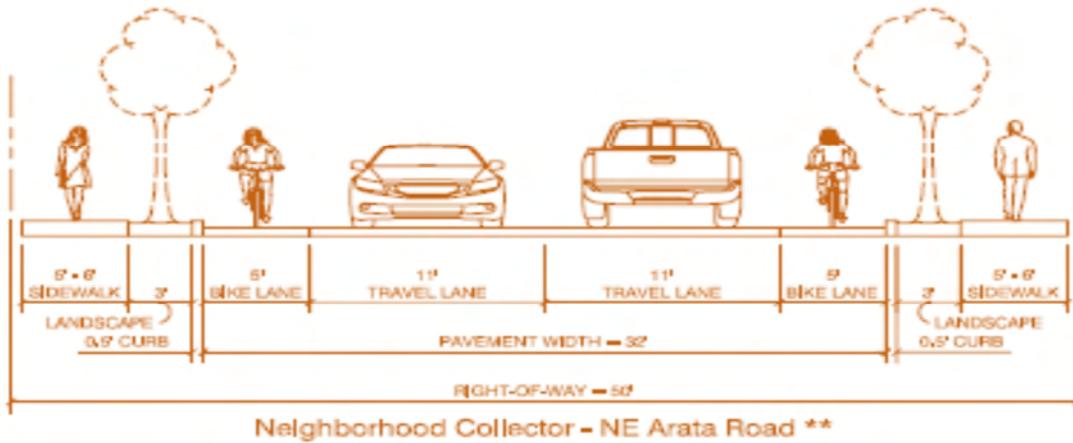

On 238<sup>th</sup>, the County will be providing major maintenance to the roadway this year. This will not change the roadway configuration, simply place new asphalt on the top several inches of the roadway surface. Many of you have already commented on the work the County completed to place asphalt in the wheel track areas on the roadway. Please be aware that this is only the start of the maintenance for the road, and that when complete, a new asphalt surface will be in place on 238<sup>th</sup> from curb to curb. To complete the portion of the work on the hill from Arata Road to Glisan, the roadway will be closed. Traffic will be detoured in the same manner as used last year during the safety widening project on 238<sup>th</sup>.

This maintenance work is NOT the reconstruction of 238<sup>th</sup> that has been identified for the East Metro Connection Plan. We expect that the funding for detail design for the rebuilding of the road will occur this fiscal year (July 2013-June 2014), and design will begin for the rebuilding of this road. While the plan for 238<sup>th</sup> does widen lanes and allow trucks back on the roadway, the details of how this will be done will all have to be worked out in the design. We will be working with the County as this design proceeds, and we will make sure residents have one or more opportunities to talk with the engineering groups that will complete this work.

## ARATA ROAD

Arata Road from 238<sup>th</sup> to 223<sup>rd</sup> received funding in 2011-2012. The design work on the road is nearing completion. Multnomah County engineering representatives have come to the City to change the proposed design for the roadway. This layout design, known as the template, identifies generally how the

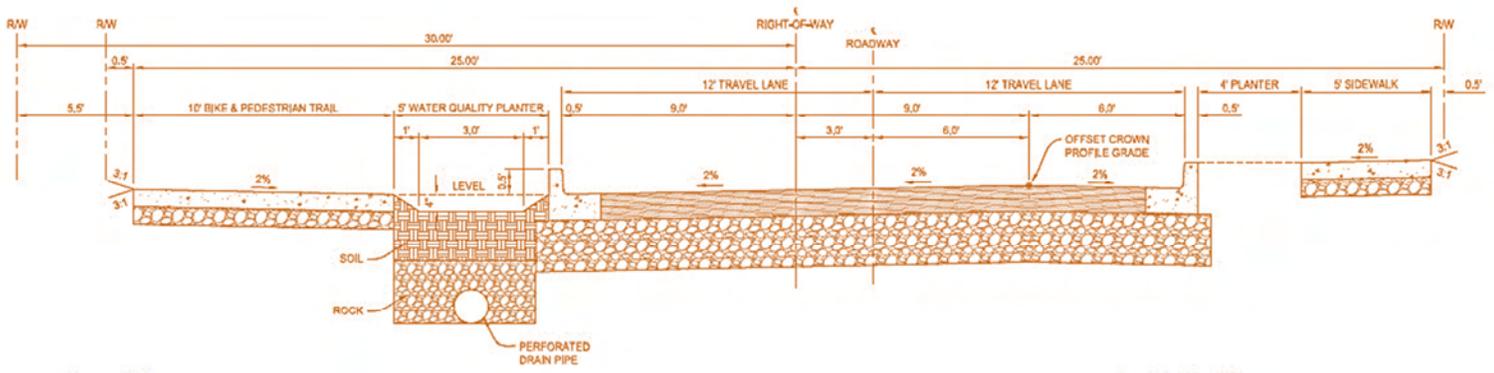

space in the right of way will be used by travel lanes, sidewalks, bicycle lanes, planter strips, and other features of the road. The plan for the roadway called for the following:

As revised, the Arata Road template will have the following features:

1. Two 12' travel lanes
2. Curb and Gutter
3. One 4' Planter Strip on one side and no planter strip in the segment where sidewalk is currently installed in each direction from Wood Village Blvd.
4. One 5' sidewalk on the South side of the roadway
5. One 5' Water Quality planter in the north side
6. One 10' combined bike and pedestrian sidewalk on the North side

This template will look like this:

The change will eliminate the bicycle lanes that had been planned on the road, and substitute a combined pedestrian/bicycle facility on the north side of the roadway. The City Council and Planning Commission have reviewed this proposal, and both are delighted with the change in the design and the additional safety it will provide on Arata Road.

Construction of the roadway will be in construction season 2014. Hopefully, the funding available will be sufficient to construct the entire distance from 238<sup>th</sup> to 223<sup>rd</sup>. As the dates for construction get closer, we will provide additional information in future newsletters, and on our City web page.

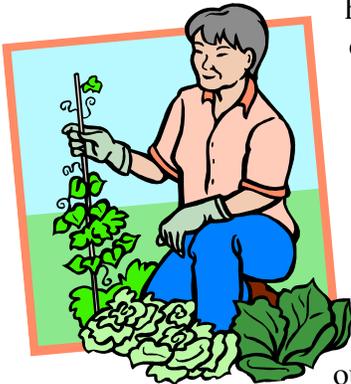

### SEE THROUGH THE EYES OF A MULTNOMAH COUNTY DEPUTY

Registration is open for the 9th Annual Citizen’s Police Academy. This free 12 week program takes place every Wednesday from 7-9pm at the Wood Village City Hall beginning September 4th. Registration is limited, and you must be 18 years or older to apply. Please note this is an information program only. You do not receive any certification or credits to become a law enforcement or public safety officer. Please see our website or stop by City Hall for more information and to fill out an application.

### LOVE TO GARDEN?

Have tricks and tips on how to grow great fruits, flowers and vegetables? Absolutely clueless about gardening, but want to learn more? If you answered yes to any of these questions the Wood Village Garden Club may be for you. This group of local residents and gardeners meets every third Thursday from 7-8pm at the Tree Hill Condominium Recreation Center on 238<sup>th</sup> Drive (just before you reach the hill). The club is open to everyone, and local resident Charlotte Harden runs the program. She can be reached at [scooter1066@hotmail.com](mailto:scooter1066@hotmail.com) if you

have questions about the club. On a related note, the Wood Village Community Garden still has a few remaining plots available. The 10’ x 10’ plots rent for \$20 a season which runs through October. Stop by City Hall or view our webpage for more

information about the Community Garden. Let’s Get Growing!

### COMMUNITY SPIRIT!

As you have probably noticed, there are new banners hanging around the City. The banners

were designed by Reynolds High School students Christina Mckvold and Carlos Barrios-Mata as part of the City’s banner design contest. Jim Mott, at Advanced Metal and Wire in Wood Village helped design and fabricate the necessary brackets for the banners. To top it all off, Comcast Cable generously

donated their time and equipment to install the banners and brackets. This project is a great example of the good things that can happen when the community comes together. Our hope is that these banners will not only help visitors recognize that they are in our great town, but grow our own Community Spirit. A big thank you to all those involved, and look for additional banners in the upcoming year!

### WOOD VILLAGE URBAN RENEWAL DIRECTOR

Steve Morasch, the Chief Financial Officer for Pressure Safe, LLC, a food processing industry located in Wood Village has accepted an appointment to the board of directors for the Wood Village Urban Renewal Agency. Steve also serves as the CFO for Morasch Meats, a well-known Portland area producer of quality meat products.

New Director Morasch brings a degree in business administration, CPA licensing and a wealth private sector experience along with service on non-profit boards. He will be a great asset to Wood Village and to the Agency.

# NATIONAL SECURITY CONFERENCE

PUBLIC WORKS DIRECTOR MARK GUNTER

Through a Regional Disaster Preparedness Organization grant, I was able to attend the National Homeland Security Conference (NHSC) held in Los Angeles, California. This Conference is the annual meeting of local Homeland Security and emergency management professionals from the Nation's largest metropolitan areas. It has become the best attended and most highly anticipated homeland security and emergency management conference of the year as it focuses on all emergency response disciplines across all levels of government. There were over 160 speakers from various agencies and countries and nearly 75 different seminars during NHSC 2013. The educational piece of the Conference covered a wide range of important homeland security issues across every discipline, including Law Enforcement, Fire Service, Emergency Management, and Health. In addition the conference included a number of educational tours of the Los Angeles region's homeland security assets such as the Los Angeles International Airport, Emergency Operations Center, and the Joint Regional Intelligence Center.

I would have to say that the ultimate highlight was the emotionally charged reception held on the historic USS Iowa Battleship on the eve of the 69<sup>th</sup> anniversary of D-Day. This event was very special given the history of this battleship and the background of the conference attendees. We stood on the deck of that great Battleship where Heroes of our nation have served and even given their all. It was a great opportunity to honor them, as well as all those who have served our nation, and those who continue to serve.

Trying to summarize the take-a-ways from this conference in a paragraph isn't easy, but here's my attempt. The speakers were dynamic, the knowledge base was immense, and the depth and breadth of emergency situations discussed was overwhelming. Throughout the conference, many of the same themes prevailed. In an emergency, training, staying calm under pressure and working cooperatively makes the difference. Through training and collaboration everyone involved is better prepared in all aspects, both intellectually and physically, to deal with the emergency at hand.

**Don't just prepare yourself, help those around you prepare!**

# CHILDREN AT PLAY SIGNS

Every sign you see on a public right of way is known as a traffic control device. Traffic control devices installed on all roads and highways within the State of Oregon are required to conform to the Manual on Uniform Traffic Control Devices (MUTCD), published by the Federal Highway Administration (FHWA), as that manual is modified by specific provisions in Oregon. All state highways and public roadways under the jurisdiction of cities and counties within the State of Oregon are required to comply by Oregon Revised Statute (ORS 810.200) and Oregon Administrative Rule (OAR 734-020-0005).

The 2009 edition of the FHWA's (Federal Highway Administration) Manual On Uniform Traffic Control Devices deleted the "CHILDREN AT PLAY" sign. This sign was replaced with the playground sign. The Playground sign is used to give advance warning of a designated children's playground that is located adjacent to the street. The "CHILDREN AT PLAY" had been intended for usage in vicinity of areas where a large number of children would be present. The MUTCD does not specifically forbid the "CHILDREN AT PLAY" signs; however, it is actively discouraged as an unnecessary and unenforceable warning sign. The logic is that a large number of warning signs actually decrease the likelihood that vehicle operators will pay attention to the sign's message.

Children live on many, if not all, streets. Some streets may have a higher concentration of children living and playing than other areas of the community at any given time. However, child population changes continuously as families move out, others move in, or children become adults.

The City of Wood Village has warning signage in place to alert drivers to the presence of children in various neighborhoods, specifically we have the following:

- “Children” (@ 231<sup>st</sup> Ct.);
- “Slow Children” (in the Lower Village) 2 signs;
- “Watch Out For Children (@ Walnut);
- “Children at Play” (235<sup>th</sup>) and one other location;
- “Watch Children” (@ 239<sup>th</sup>)

Following the City Council discussion on this issue at the City Council meeting of May 14, 2013, the City Council directed a legislative policy be developed regarding "Children at Play" signs and more specifically, the full range of signs in Wood Village. These signs are deemed as providing a false sense of security by the MUTCD, and as such are not considered proper road signs. Wood Village crews will be removing all the signs that refer to Children at Play in any form, and will only place the Playground sign above or the Pedestrian sign below where warranted.

Wood Village is not the only community electing to comply with the requirements of the Uniform Manual. Wood Village officials contacted multiple counties and cities, and found most were electing to comply with the manual and eliminate warning signs for “Children at Play”.

Wood Village crews will be removing the signs on July 25, 2013. If you have concerns, or would like to talk to the City Council about this decision, they meet on Tuesday, July 23, 2013, at 6:00 P.M. in the City Hall, 2055 NE 238<sup>th</sup> Drive.

## DID YOU HEAR THAT HOWL?

Coyotes have been spotted in several locations in and around Wood Village. There is no reason for panic or alarm as coyotes are generally afraid of us and run away once they've been spotted, but there is a real concern for the safety of small pets.

Here are some helpful tips to help prevent your property and furry family members from being impacted by coyotes:

- Secure your garbage and do not leave food outside. Coyotes are great scavengers and can rip through garbage bags or unsecured garbage cans. They can also smell food left out for other pets or wildlife. If you have a bird feeder, keep the surrounding area clean. Leftover bird seed attracts small rodents which in turn attracts coyotes.
- Keep your pets indoors at night, or put them in a fully secured, quality built outdoor pen or structure. Cats and smaller dogs are especially vulnerable.
- Keep brush and yard debris to a minimum. Coyotes can live and take refuge in small brush piles or overgrown areas.
- Call the non-emergency number 503-823-3333 if you see a coyote threaten or attack a person. Provide the operator of the location, and what direction the coyote went.

A coyote's territory can be anywhere between 2-30 miles. While there have been recent sightings of coyotes, that does not necessarily mean they are residents of the City. Likewise, just because

there may not be any sighting in a given period of time, does not mean that a coyote isn't staying in the area, and care should still be taken when it comes to small pets. Coyotes are an essential part of the eco system, and by following the tips listed above we can reduce the impacts to property and pets.

## DUMPSTER DAZE

The Wood Village Clean Up Day was a huge success. We were able to remove over 10 tons of bulky waste, 1.5 tons of scrap metal, 3 tons of yard debris and over 58 tires! Our reusable furniture area was also a great success. We had everything from furniture and bikes, to new toys and almost new clothes. We were able to keep items from the waste stream while helping people from the City.

This was the first year of having a drop off event, but help was available for elderly and disabled residents. Volunteers also drove around the City helping residents load their items to take to the site. This event would not have been possible without the help from our sponsors which included Metro, Waste Management, Wood Village Baptist Church, The Eagles, Frontier and Wal-Mart.

We are looking forward to holding another drop off event next year, but remember to properly dispose of your unwanted items in a timely manner before they become a problem. The accumulation of

solid waste is a code violation, and we all want to live in a clean neighborhood and City. Please visit our website, or [www.oregonmetro.gov](http://www.oregonmetro.gov) to find a list of waste providers and dump sites.

## THE WOOD VILLAGE CRYSTAL BALL

- Want to make a Water and Sewer Payment?
- Need to look up a Business in the City?
- Want to file a report of Graffiti?
- Need to fill out a Business License Application?
- Want to leave feedback on how we are doing?
- Need help preparing your emergency kit?
- Get all the latest information about important City meetings, events, and projects in one spot.

A crystal ball is not needed, just an internet connection. The City of Wood Village's website is full of useful information. From online payments to electronic forms the City's webpage is your one stop shopping place for everything Wood Village. Find out about important meetings, events and projects using the quick links on the right hand portion of the webpage. Get information about Wood Village businesses, codes, permits and other useful information using the navigation bar on the left hand side of the page. Having trouble finding what you are looking for? Try our Search menu at the top of the page. If it's about Wood Village, it's on the webpage. Take a look at [www.ci.Wood-Village.or.us](http://www.ci.Wood-Village.or.us).

## WATER CONSERVATION – BE WATER SMART

Water is a valuable resource; using it wisely will help us fill the needs of people, industries and businesses while also keeping fish and other aquatic life alive and well. The average American family uses more than 300 gallons of water per day at home. Roughly 70 percent of this use occurs indoors. Nationally, outdoor water use accounts for 30 percent of household use yet can be much higher if you have more water-intensive landscaping. Water also plays a big role in our local communities. Without water there would be no local business or industry. Firefighting, municipal parks and public swimming pools all need lots of water.

Many factors impact water availability. Higher temperatures, population growth, and economic expansion contribute to an increase in paved surfaces, which means more stormwater runoff and allows less water to be absorbed through the ground. Using water efficiently and avoiding waste is fundamental to ensuring water availability.

### Indoors

Purchasing high-efficiency products will help you down the road to savings, but don't stop there. There are lots of things you can do in your own home to reduce water use and get more from less. Just follow our simple tips below to get started!

#### Here, there, and everywhere:

- Small household leaks can add up to gallons of water lost every day. Check your plumbing fixtures and irrigation systems routinely each year.

#### Over half of all water use inside a home takes place in the bathroom:

- Turn off the tap while shaving or brushing teeth.
- Showers use less water than baths, as long as you keep an eye on how long you've been lathering up!

### In the kitchen- whip up a batch of big water savings:

- Plug up the sink or use a wash basin if washing dishes by hand.
- Use a dishwasher; make sure it's fully loaded and scrape don't rinse!
- Keep a pitcher of drinking water in the refrigerator instead of letting the faucet run.
- Thaw in the refrigerator overnight rather than using a running tap of hot water.
- Add food wastes to your compost pile instead of using the garbage disposal.

### In the laundry room—where you can be clean AND green:

Wash only full loads of laundry and use the appropriate water level or load size selection on the machine.

### Outdoors

Of the estimated 29 billion gallons of water used daily by households in the United States, nearly 7 billion gallons, or 30 percent, is devoted to outdoor water use. In the hot summer months, or in dry climates, a household's outdoor water use can be as high as 70 percent.

### In the yard—be beautiful and efficient:

- Create a water-smart landscape that is both beautiful and efficient to give your home the curb appeal you desire.
- Timing is everything! Knowing when and how much to water allows you to keep a healthy landscape.
- Find a certified irrigation professional to install, maintain, or audit your irrigation system to ensure it is watering at peak efficiency.

### Other outdoor uses—drop that hose and keep it covered:

- Sweep driveways, sidewalks and steps rather than hosing off.
- Wash the car from a bucket, or consider using a commercial car wash that recycles water.
- Use a cover to reduce evaporation when pool is not being used.

### Understanding Our Own Water Use

An easy way to understand individual water use is to look at your water bill—not just the amount due, but how much water you used. Does your water use increase during certain times of the year? How does it compare with your neighbor? Once you understand how much you use, you can see what you can do to be

## 230<sup>TH</sup>/231<sup>ST</sup> CONNECTOR

During the planning and construction of the Coreander Subdivision, a 10' wide walkway tract between the NE 230 Ct and NE 231<sup>ST</sup> Ct cul-de-sacs was dedicated to the City for the purpose of providing pedestrian and bicycle access between NE Arata Rd and NE Halsey St. Though constructed at the time the subdivision was built, over the years the concrete began to break up creating a hazard and a generally unattractive walkway. Also since that time, fences have been installed, additional parking lots constructed and ADA access was lacking.

The safety and security of the growing numbers of both pedestrians and adjacent residents has been compromised. After several community involvement meetings with neighbors, a plan for the 230<sup>th</sup>/231<sup>st</sup> connector was adopted. The plan included adding lighting, ADA handicap access, trash cans, fencing, landscaping and a stamped concrete surface that will help bring safety and a new level of security to the neighborhood and the pedestrians using the walkway.

In 2011 the City received a Community Development Block Grant (CDBG) for \$66,575.00 to improve the safety and the

appearance of the City-owned 10' wide pedestrian access tract between the two cul-de-sacs. The City selected CG Contractors, LLC, to complete the project after a formal bidding process was completed. Their bid was \$52,560.00. Construction on the 230<sup>th</sup>/231<sup>st</sup> Sidewalk Connection project has been completed, fulfilling one element of the City of

## The Village News

Wood Village's Transportation System Plan (TSP). This plan recognizes the importance of connections between NE Arata Road and NE Halsey St as the basis for bicycle and pedestrian movement between residential areas and from those to transit facilities and commercial centers.

We hope to create additional pedestrian pathways between Arata and Halsey over the next several years to help people get to where they need to go. Look for improvements to the pedestrian pathway adjacent to the Ukrainian Bible Church in the future!

## THE WOOD VILLAGE ARBORETUM

Not long after the turn of the Century, City of Wood Village parks advocates began talking about the desire to have an arboretum-like component to the Donald L. Robertson Community Park. At that time a Community Development Block Grant (CDBG) was applied for and awarded for a portion of that dream amounting in nearly \$28,000 in landscaping, minor stream bank restoration and fairly extensive tree planting. This next phase of the long-term project includes building on the recent wetlands enhancement project, the wetlands boardwalk project and the trails extension project.

The arboretum project got off to a terrific start Wednesday, May 29th with students from Arata School and City staff planting the first of several phases of planting groups just south of the ball fields. Among those planted that day were five blueberry plants, four Evergreen Huckleberry, four flowering Currant, four Oregon Grape, seven Salal, with a Canada Red Choke Cherry, a Red Alder, an Oregon White Oak, a Pin Oak and two Beaked Hazelnut keeping all the children (and staff) quite busy.

The native trees and shrubs will offer a variety of colors, textures, heights and shapes as well as some native fruit (in time) that are a good starting point for an arboretum. Smaller, more concentrated areas of shrubs and supplemental plantings will be added later to enhance and complement the trees, creating a more intimate micro-habitat. A trail with natural boulders sourced from the area to provide seating will be added in the fall. To insure survival of the trees, staff has installed self-watering skirts for the trees with a drip system to be included in the Fall planting phase.

The Donald L. Robertson Community Park is the jewel of the city and the center of the City's recreational activities from its playgrounds and sport fields to picnicking, hiking and walking, and to the natural environment of its wetlands so loved by enthusiasts who visit regularly. Despite all this found in 21 acres there is ample space for a diverse and complementary number of native and cultivar tree species. In keeping with the established theme, this project adds a number of groupings that not only will provide the botanical diversity, but greater, more enhanced habitat. Arguably it might not be the largest or most comprehensive of arboretums in the Portland Metropolitan area, but it would be one of the few entirely sponsored and encouraged by a small city entity.
